

# Safety from crime!

Sweden is facing many problems with work-related crime. Employees risk having to experience threats and violence in the workplace or being exploited by criminal employers.

Authorities have to be able to cooperate, the police need to be able to prioritize the crimes, and the punishments need to be forceful and deterrent.

Employers should have a sharpened responsibility to counteract threats, violence and harassment in the workplace.

Employees should be protected against work-related crime. No one should be unsafe in their working life!

## We want

- The protection against threats and violence towards employees to be strengthened
- The punishments for those who expose others to crime to be harsher
- The authorities to cooperate to prevent and stop crime

**On the website Hela svaret we explain further what we find important.**
